Education

BA, MATH AND COMPUTER SCIENCE | BOSTON UNIVERSITY | GPA: 3.78

SPRING 2025

- Includes 1 year coursework Master's Level Machine Learning/Deep Learning

My Stack

Images: Nano Banana for generation, GIMP for manual edits, Flux Klein for compositing/editing/ControlNet.

Videos: Seedance/Kling for generation, LTX 2.3 for character consistency (i.e. ID-LoRA)

Audio: Suno for music, Eleven Labs for voiceover

Editing: DaVinci Resolve

Development: Python, Pytorch, ComfyUI, Codex, Github

Experience

FOUNDING ENGINEER | IDESIGNGLOBAL AI-POWERED VISUALS AND BRANDING

2024 - PRESENT

- Developed retrieval augmented generation pipeline using prompt engineering with LLMs (OpenAI's GPT, Google's Gemini) to create graphic designs based on real time social media trend analysis.
- Designed, launched, and scaled an AI-powered visual storytelling brand ("The Adventures of Danny Hoopenbiller"), producing 100s of AI-generated viral Reels (1M+ organic views in past quarter) with up to 90% virality rate per post.

WRITER, DIRECTOR, EDITOR | VARIOUS AI SHORTS

2026 - PRESENT

- ["The Last Time I Saw Da Vinci" short film viewable on YouTube](#). AI stack included Flux Klein (keyframe compositing + upscaling), Seedance 2.0 (video generation) and Eleven Labs (voice generation). **Nominated for PixVerse Award at 2026 MIT Global Film Hack.** [Screenplay viewable here](#).
- ["Not Gonna Make It" short film viewable on YouTube](#). AI stack included Nano Banana Pro, Seedance 1.5 and Gaussian Splats for efficient multi-angle coverage of environment from sparse AI-generated set photos. [Screenplay viewable here](#).

COMFYUI DEVELOPER

2025 - PRESENT

- Developed custom nodes + workflows for the open-source AI image and video generation software ComfyUI, adding features such as [support for new frame interpolation models](#), [implementation of quantized Stable Diffusion XL](#) and [implementation of few-step quantized Flux sampling](#).

WRITER, EDITOR, ACTOR | BAY STATE TV SERIES | BOSTON UNIVERSITY

2023 - 2025

- Contributed to episodes including ["The Priest With The Cross Tattoo"](#), ["Call Me By Your Catholic Name"](#) and ["The Killer"](#). [Writing sample viewable here](#).

STUDENT RESEARCHER | BOSTON UNIVERSITY

2022-2023

- Trained Generative Adversarial Networks using Tensorflow library to synthesize Alzheimer's Disease MRI scans, achieving an structural similarity index measure of 0.938 ± 0.001 . [Slides for BU UROP Symposium and Harvard NCRC 2024](#)
